

Secure Vaulting Services

Today's ever changing Regulatory Requirements make "Protecting Your Data" essential to any size business. While data protection is certainly necessary, it is easy to overpay for services that you may not need.

AIS can ensure your data is safe and secure with your choice of dedicated vaulting services to meet YOUR security and budget requirements.

Secure Vault Storage

Over 40 years of media handling experience as a tape manufacturer assures your tape, hard drives or documents will be handled and stored with the utmost care

Secure shipping with GPS tracking and full Chain of Custody service is available for product coming into our facility

Complete inventory by volume serial number will be provided upon receipt in our Secure Storage Facility

Individual vaults designed to meet ANSI environmental standards for the storage of computer media

Secure Copy/Conversion services means your older legacy tapes can be copied to newer technology and returned to you in a current technology format

Secure destruction services within same facility when retention period expires on tapes and hard drives stored at AIS

Secure Electronic Vaulting

Over 13 years experience in providing Network Security Solutions

Secure Vaulting service with encryption during the entire process

Deduplication at the source for maximum efficiency

Virtual Business Continuity (vBC) services offer real time replication of your data to a dedicated secure server at our hosting facility so your users can continue to work in the event of a planned or unplanned outage

Advanced Real Time protection agents utilized during data transfer

Dedicated Secure Utility Cloud Solutions provide full administrative control over your environment

Your Data Security is our #1 Concern
